**Specifications described as unique or exclusive to First Edition may be available separately or in combination in second and subsequent model years.

Vehicles shown are from the Jaguar Global range. Specifications, options and availability will vary between markets and should be verified with your local Jaguar Retailer. The figures provided are official EU Test Figures. For comparison purposes only. Real world figures may differ.

NEDC (New European Driving Cycle) is the previous driving cycle used to measure fuel consumption and emissions in passenger vehicles in Europe. WLTP (Worldwide harmonised Light vehicle Test Procedure) is the new process that has been phased in from 2017, which measures fuel, energy consumption, range and emissions. This is designed to provide figures closer to real-world driving behaviour. It tests vehicles with optional equipment and with a more demanding test procedure and driving profile. Figures are shown for the NEDC and for the new WLTP driving cycle tests. The difference in figures is due to a change in how the vehicles are tested, rather than a reduction in performance. Official EU test figures from manufacturer tests under EU legislation. For comparative purposes only. Real world figures and overall EV performance data may vary according to driving and environmental variables.
